ACL Laboratories Offers new Comprehensive Drug Screen – Pain Management Profile

Test Order Code LAB12254

May 2024

Effective Wednesday, May 22, 2024, ACL Laboratories will introduce a new test **Pain Management Profile (Test Order Code LAB12254)** replacing the current test that is performed at an external reference laboratory (Pain Management Profile 1 Test Order Code LAB9740).

The new test **Pain Management Profile (Test Order Code LAB12254)** is a comprehensive urine drug panel that is intended for use in pain management patients and those requiring routine drug monitoring. The panel utilizes definitive LC/MS methodology to test for common prescribed and abused drugs. All positive results are quantitatively reported. Patient medication information **must** be provided to receive an interpretative report. Results will indicate whether findings are consistent or inconsistent with supplied medication information.

With the addition of this new test, Pain Management Profile 1 (Test Order Code LAB9740) will be deactivated, effective Wednesday, May 22, 2024.

The specimen requirements are:

Volume: 30.0 mL Random Urine

Collection: Must be collected in a sterile urine container

Transport: Refrigerated

The features of this new panel include:

- Patient medication information **must** be provided – Ask at Order Entry question for clinicians to select prescribed medication from pick list.
- Testing **performed in-house** by ACL Wisconsin Central Laboratory.
- Turn-around Time: **Within 4 days** (testing performed Monday through Friday)
- **Results electronically interfaced** and discretely represented in Epic patient chart (not a scanned image).
- Report includes **interpretation of consistency with prescribed medications** indicated by clinician during order-entry.
- Specimen Validity Test Panel will be performed on all specimens (creatinine, pH, oxidant screen).

The following drugs will be tested definitively by LC/MS and all values above the cut-off concentration will be quantitatively reported.

	Positive Cut-Off (ng/mL)
Amphetamines	
Amphetamine (Adderall)	50
Methamphetamine	50
Phentermine	50
MDA	50
MDMA (Ecstasy)	50
Methylphenidate	
Methylphenidate (Ritalin)	20
Synthetic (Bath Salts)	
Alpha-PVP (Flakka)	10
Gabapentin	
Gabapentin (Neurotonin)	1,000
Pregabalin	
Pregabalin (Lyrica)	1,000
Antidepressants	
Amitriptyline (Elavil)	40
Nortriptyline	40
Bupropion (Wellbutrin)	40
Citalopram (Celexa)	40
Desmethyldoxepin (Sinequan)	40
Duloxetine (Cymbalta)	40
Fluoxetine (Prozac)	40
Mirtazapine	20
Paroxetine (Paxil)	40
Sertraline (Zoloft)	40
Venlafaxine (Effexor)	40
Benzodiazepines	
Alprazolam	40
Alpha-Hydroxy Alprazolam	40
7-Amino Clonazepam (Klonopin)	40
Lorazepam (Ativan)	40

	Positive Cut-Off (ng/mL)
Nordiazepam (Librium)	40
Oxazepam	40
Temazepam	40
Opiates	
Heroin Metabolite (6MAM)	5
Codeine	50
Hydrocodone (Vicodin)	50
Hydromorphone	50
Morphine	50
Norhydrocodone	50
Naltrexone	10
Noroxycodone	50
Oxycodone (Percocet)	50
Oxymorphone	50
Buprenorphine (Suboxone)	
Buprenorphine	10
Norbuprenorphine	10
Naloxone	20
Fentanyl and Metabolite	
Fentanyl	5
Norfentanyl	10
Meperidine (Demerol)	
Meperidine	40
Normeperidine	40
Methadone and Metabolite	
Methadone	50
Methadone Metabolite (EDDP)	50
Propoxyphene (Darvocet)	50
Tapentadol	
Tapentadol (Nucynta)	40

	Positive Cut-Off (ng/mL)
Tramadol	
Tramadol	50
O-Desmethyl-Cis-Tramadol	50
Carisoprodol	
Meprobamate	50
Carisoprodol-SOMA	50
Muscle Relaxant	
Cyclobenzaprine (Flexeril)	40
Zolpidem	
Zolpidem (Ambien)	10
Ketamine	
Ketamine	10
Cocaine Metabolite, Urine Quantitative	
Benzoylcegonine	40
PCP	
Phencyclidine	10
THC Metabolite	
TCH-11-Nor-Delta-9-Carboxy	25
Miscellaneous	
Barbiturates, Screen only	200
Ethanol, Urine Screen	10 mg/dL
