### ACL RESP. PANEL - RSV PCR - 2.2%, RSV EIA - 4.3%

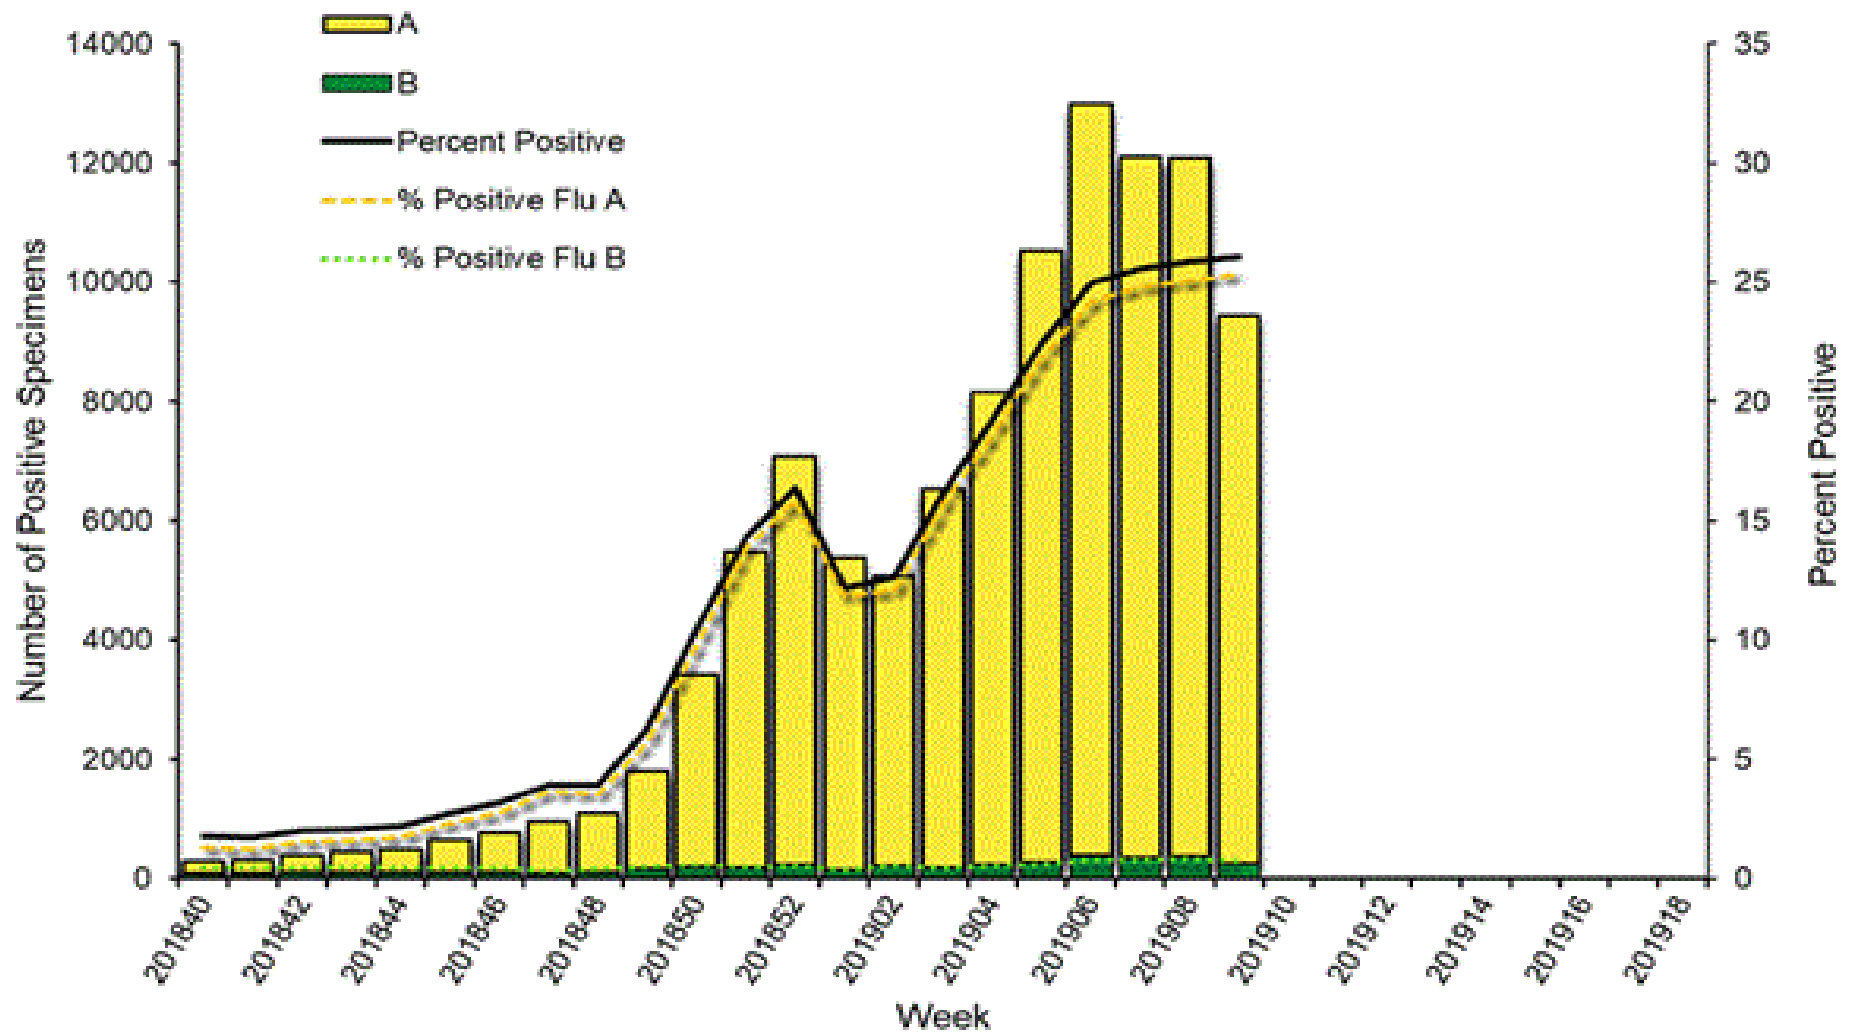

## Correlation between RPPNL (FLU PCR) and Sofia (FLUAG) - Accuracy 95.8%

In Jan/Feb two months 1758 samples were tested by both methods most of them negative, 97/171 samples were positive by EIA when confirmed by PCR. 74 negative EIA samples were tested positive by PCR method. (ACL correlation data is compiled on samples collected within <48 h). Since positive rate is under-represented and provides correlation on very small fraction of positive samples – interpret clinical sensitivity with caution.
